

Application No.: 09/854,315
Amendment dated: September 23, 2003
Reply to Office Action of July 22, 2003

Amendments to the Specification:

Please replace the paragraph beginning at page 10, line 10, with the following rewritten paragraph:

- - The composition of the present invention may also include various supplemental ingredients such as saccharides. When one or more saccharides are present in the composition, however, in order to avoid the disadvantages associated with the use of saccharides as described above, the total saccharide concentration is less than 16 percent by weight. Preferably, the saccharide concentration is less than 15 percent by weight and more preferably, 10 percent by weight or less. Most preferably, the composition is substantially devoid of saccharides. Therefore, the composition of the present invention may include one or more saccharides with the proviso that when a saccharide is present, it is present at a weight percentage of less than 16 percent. - -
